

Key	Summary	Upgrade notes	Component/s
NXP-14664	NXP-14663 Default UserWorkspace should be overridable	Implementation of the <code>DefaultUserWorkspaceServiceImpl</code> has been modified : this means that all custom inherited classes should be reviewed. Thanks to the refactoring, the inherited classes should now be able to modify the behavior without duplicating code.	User preferences/Profile
NXP-14842	Foldable Boxes > Updates styles	The icon <code>lightbulb.png</code> has been deleted. Now you can use <code>help.png</code>	Style & CSS
NXP-14787	Remove webwidgets module	<code>nuxeo-theme-webwidgets</code> modules dropped, need to use <code>opensocial</code> gadgets instead	Seam/JSF UI, Themes
NXP-14840	Rename Rest Contributor into Content Enricher	The interface <code>org.nuxeo.ecm.automation.io.services.contributor.RestContributor</code> has been renamed into <code>org.nuxeo.ecm.automation.io.services.enricher.ContentEnricher</code> Rest Contributor contributions has been renamed to Content Enricher. Here is the new renamed service: <pre>{code} <extension-point name="enricher"> <documentation> <code> <enricher name="children" class="org.nuxeo.ecm.automation.rest.test.service.SampleChildrenContributor"> </enricher> </code> </documentation> <object class="org.nuxeo.ecm.automation.io.services.enricher.ContentEnricherDescriptor"/> </extension-point> {code}</pre> Documentation here: http://doc.nuxeo.com/x/5wUuAQ	Rest API
NXP-14712	Fix NPE in select2 widgets when parentId is not found	Select2-based widgets do not throw NPE anymore when a vocabulary entry has a non-existing parent. The entry is displayed like any other orphan entry.	Layouts & Widgets
NXP-14549	Fix synchronous recurse indexing Elasticsearch		Elasticsearch
NXP-14884	Include MongoDB template in distribution	To activate MongoDB, add <code>"mongodb"</code> to the templates IN ADDITION to the existing ones or to the <code>"default"</code> one. This is because the database configuration from the other templates is still needed for various datasources (for directories, audit, etc.).	Core MongoDB
NXP-14672	Factor common code for VCS and DBS	The system property allowing the definition of a custom fulltext word splitting (NXP-5689) has been changed from: <code>org.nuxeo.vcs.fulltext.wordsplit</code> to: <code>org.nuxeo.fulltext.wordsplit</code>	Core MongoDB, Core SQL Storage
